

Name: Oliver Chen

Class: MATH Elementary Statistics Meth II

Section: 001

No problem with chapter one terms, chapter two graphs, no problem with the definition of mean, mode and median. Not much problem with sets, probability

Problems:

1. in the calculating percentiles what's is n stand for, kind of confuse on how do we actually calculate the percentiles
2. How do we solve the quartiles and percentiles base on the graphs?
3. Things that are relate to quartiles and percentiles is unclear for me
4. Need to get familiar with all different rules
